SAVAGE CLASSIC KIT

Last year we purchased a Savage kit, and we have now found an engine for it. We have just begun the assembly process. We will keep you updated as the process progresses. We are hoping to have it ready for spring flying! It will be registered as an E-LSA. Watch for it at an airport near you! Maybe you may even want to make it your own.

SUN 'N FUN

We will **NOT** be attending Sun 'n Fun this year. Due to the economic climate, we feel our time and efforts would be better spent attending regional fly ins. The logistics of getting planes to Florida in time for the show, without being delayed due to weather is quite a task. Of course, demo flights are still available in Manitowoc, WI. Please call Lakeshore Aviation at (920)682-0043 to book your demo flight.

We will also be happy to give demo flights when we are out and about with the aircraft.

Savage featured in the February issue of Light Sport and Ultra Light Flying magazine!

The Savage is on the cover of February's Light Sport and Ultra Light Flying magazine, along with an awesome review by Dan Johnson and some great photos. There is also a report card on the Savage, pick up your copy today!

Above are the links to the magazine's website, and Dan Johnson's website.

INTEREST HIGH

Thank you to all who keep contacting us via telephone or email. The response to Savage is great! Many comments on the craftsmanship of the aircraft. All are impressed that such a great plane could start at only \$70,000.00 delivered to Manitowoc, Wisconsin. Why Manitowoc?

We are dedicated to making purchaser's of Savage feel comfortable flying the aircraft before they take it to their home field. We

will install the wings, and make final rigging connections. We will contact the DAR, get your plane issued it's airworthiness certificate, and take care of the FAA registration paperwork.

We have two tail wheel instructors who can show you how to get the most out of your Savage flying. Most insurance companies will require at least a few hours to be checked out in your new plane, even if you have many logged tail wheel hours.

We will have spare parts on hand in case any unforeseen problem may arise in the first hours of flight, and beyond if necessary. We are dedicated to quality control and helping you to keep your Savage flying safely!

Brrrrr!!!!
